

Arkitektur Principper i praksis
Modul 7 – Intro til operations

Arkitekturprincipper i praksis

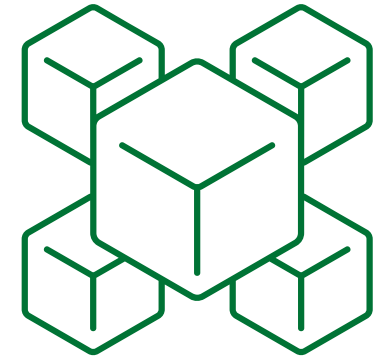

**Intro til
Operations**

**Deployment-
miljøer**

**Intro til
Kubernetes**

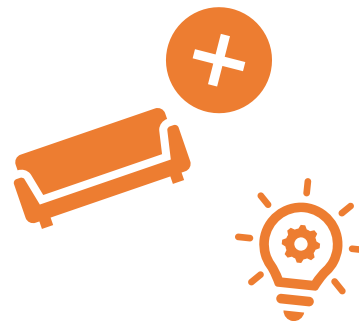

Dagens litteraturliste

- Docker images genopfriskning
 - [Docker docs] [Building best practices](#).
- Læs overblikks dokumentation fra Kubernetes site:
 - [Overview](#)
 - [Cluster Architecture](#)
 - [Containers](#)
 - [Workloads](#)

Supplerende:

- [Nick Chapsas] [How to deploy .NET apps to Kubernetes](#)
- [TechWorld with Nana] [Docker vs Kubernetes vs Docker Swarm | Comparison in 5 mins](#) [Video]
- [TechWorld with Nana] [What is Kubernetes | Kubernetes explained in 15 mins](#) [Video]
- [TechWorld with Nana] [Kubernetes Components explained! Pods, Services, Secrets, ConfigMap](#) [Video: 18 min]

Afrunding

2026-03-18

Litteraturliste :

- Læs [Abbott&Fisher2015]:
 - kap. 15 - Focus on Core Competencies: Build Versus Buy (10 sider)
 - kap. 18 - Barrier Conditions and Rollback (11 sider)
 - kap. 31 - Monitoring Applications (12 sider)
- [Kubernetes: Performing a Rolling Update.](#)
- Vi skal arbejde med monitorering i Kubernetes, så vi hiver nogle gamle kendinge frem fra gemmerne: NLog, Loki & Grafana
 - så tag et kig på hvordan var det nu det var at arbejde med dem i **C#**.
